GRAY'S ANATOMY FOR STUDENTS

Gray's Anatomy for Students is a clinically oriented, student-friendly textbook of human anatomy. It allows students to learn anatomy within the context of many different curricular designs, and within ever-increasing time constraints.

The artwork in this textbook presents the reader with a visual image that brings the text to life and presents views that will assist in the understanding and comprehension of the anatomy.

Salient Features

- Each regional anatomy chapter consists of four consecutive sections: conceptual overview, regional anatomy, surface anatomy, and clinical cases.
- The Second South Asia Edition of this textbook has two volumes: Volume One—The Body, Upper Limb, Lower Limb, Abdomen, Pelvis and Perineum; and Volume Two—Thorax, Back, Head and Neck, and Neuroanatomy.
- New content has been added on the basis of updates in the Fourth International Edition, including the addition of a new chapter on neuroanatomy.
- The innovative features of the First South Asia Edition such as Set Inductions, Outlines, and Flowcharts have been improved.
- Students are encouraged to use online resources available on MedEnact.
- A unique feature of this edition is that each chapter contains line diagrams, abbreviated as LDs, along with questions and answers. These line diagrams are sketches which are easy to draw during an examination and can help students to acquire anatomical concepts and do well in assessment. The questions and answers facilitate learning.
- Competencies have been added in all the chapters since the curriculum is becoming competency based.

Dr. Raveendranath Veeramani is a medical graduate and a qualified anatomist from St John's Medical College, Bangalore, India. Students consider him as a popular anatomy teacher and he has received many awards during his undergraduate and postgraduate training. He received the "Excellence in Anatomy Award, 2018" at CIMCON Foundation in association with World Organization of Family Doctors. He is currently working as an associate professor of anatomy at the Jawaharlal Institute of Postgraduate Medical Education and Research (JIPMER), Puducherry, India. He has several publications in international and national peer-reviewed journals, and serves as a member of the International Advisory Board of Elsevier Global 3D Anatomy.

Dr. Sunil Jonathan Holla was formerly the professor and Head of the Department of Anatomy, Christian Medical College (CMC), Vellore. He has more than 32 years experience of teaching Anatomy. He had taken sabbatical leave from CMC to work at BPKIHS, Nepal; KUMS, Nepal; Mekelle University, Ethiopia and AUA, Antigua. He has a passion to simplify the learning of Anatomy. He received the Favourite Basic Science Teacher Award at KUMS Nepal in 2004. He is a FAIMER fellow and has done the Advance Course in Medical Education. He is the co-convenor of the Medical Council of India (MCI) Nodal Centre for faculty development at CMC Vellore. He has facilitated the planned Anatomy learning experience for students at various universities.
